**Learning with Partially Labeled and Interdependent Data** Massih-Reza Amini, Nicolas Usunier

This book develops two key machine learning principles: the semi-supervised paradigm and learning with interdependent data. It reveals new applications, primarily web related, that transgress the classical machine learning framework through learning with interdependent data.

The book traces how the semi-supervised paradigm and the learning to rank paradigm emerged from new web applications, leading to a massive production of heterogeneous textual data. It explains how semi-supervised learning techniques are widely used, but only allow a limited analysis of the information content and thus do not meet the demands of many web-related tasks.

Later chapters deal with the development of learning methods for ranking entities in a large collection with respect to precise information needed. In some cases, learning a ranking function can be reduced to learning a classification function over the pairs of examples. The book proves that this task can be efficiently tackled in a new framework: learning with interdependent data.

Researchers and professionals in machine learning will find these new perspectives and solutions valuable. Learning with Partially Labeled and Interdependent Data is also useful for advanced-level students of computer science, particularly those focused on statistics and learning.

**From reader reviews:**

**Carissa Taylor:**

Book is written, printed, or created for everything. You can know everything you want by a e-book. Book has a different type. As we know that book is important point to bring us around the world. Close to that you can your reading proficiency was fluently. A book Learning with Partially Labeled and Interdependent Data will make you to possibly be smarter. You can feel much more confidence if you can know about every little thing. But some of you think in which open or reading a book make you bored. It isn't make you fun. Why they might be thought like that? Have you trying to find best book or suited book with you?

**Victor Green:**

The book Learning with Partially Labeled and Interdependent Data can give more knowledge and information about everything you want. Why must we leave a very important thing like a book Learning with Partially Labeled and Interdependent Data? Wide variety you have a different opinion about book. But one aim in which book can give many information for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or info that you take for that, it is possible to give for each other; you could share all of these. Book Learning with Partially Labeled and Interdependent Data has simple shape but the truth is know: it has great and big function for you. You can seem the enormous world by open and read a e-book. So it is very wonderful.

**Brandi Johnson:**

Playing with family in a very park, coming to see the coastal world or hanging out with friends is thing that usually you could have done when you have spare time, subsequently why you don't try issue that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Learning with Partially Labeled and Interdependent Data, you may enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh come on its mind hangout folks. What? Still don't buy it, oh come on its referred to as reading friends.

**Marion Driskell:**

As a college student exactly feel bored to help reading. If their teacher requested them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that looking at is not important, boring and also can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Learning with Partially Labeled and Interdependent Data can make you sense more interested to read.
