Cost-Outcome Methods for Mental Health William A. Hargreaves, Martha Shumway, Chou Li-Wei, Brian Cuffel

Cost-Outcome Methods for Mental Health provides an overview of the choices and judgments used to evaluate the cost effectiveness of mental health treatment. It presents economic concepts of cost, discusses the various approaches to cost-outcome studies, and focuses on the way such studies apply to mental health. It is a practical guide rather than a theoretical treatment of cost-effectiveness analyses. Readers are guided through the process of designing cost-outcome studies; measuring costs, interventions, and outcomes; analyzing study results; and using findings to guide policy and practice. The book introduces readers who do not have a background in economics to apply economic methods of cost-outcome research, and prepares them for productive collaboration with economists in mental health services research.

Key Features

- * Clearly explains key economic concepts for non-economists
- * Integrates the presentation of both economic and clinical aspects of design
- * Provides many examples of applications to mental health services
- * Authored by leading mental health services investigators
