Excerpt from Why Bonds Are Safe Investments

The average person perhaps does not realize to what an extent he is now indirectly investing in bonds, and enjoying the advantages which bonds have made possible. The insurance company in which he, his family or his property is insured invests its funds largely in bonds. So very likely to a considerable degree does the bank in which he deposits his money. The school where he sends his children has probably been built from the proceeds of a bond issue, as have many of the other public improvements of his community, the local electric light plant, the waterworks, the railroads which developed the country nearby, the trolley lines on which he rides, etc. Many of the greatest conveniences of the present day would have been impossible if bonds had not been considered safe investments by a very large number of people. It is the purpose of this pamphlet to explain the elements of safety which have made this class of securities so popular with careful investors.
