Drinking in Context: Patterns, Interventions, and Partnerships

Drinking in Context: Patterns, Interventions, and Partnerships

Drinking beverage alcohol is a widespread source of individual and social pleasure in most countries around the world. Yet, some drinking patterns can lead to serious physical, mental, and social harms. *Drinking in Context* is intended to complement existing volumes dealing with international alcohol policy by focusing on three main themes: *drinking patterns*, *targeted interventions*, and *partnership development*.

An understanding that patterns of drinking are important predictors of outcomes has led to a growing realization that alcohol policies and prevention strategies need to focus on excessive or irresponsible drinking. As a result, there has been a shift towards interventions that address the targeted reduction of harm. These approaches recognize socio-cultural differences and avoid trying to impose a one-size-fits-all solution. In this context, multi-stakeholder partnerships offer an excellent opportunity to promote the complex mix of measures required by each society. Shared responsibilities lead to shared solutions.
