**Algebra and Trigonometry with Modeling & Visualization, Books a la Carte Edition (5th Edition)**

Gary K. Rockswold

**This edition features the exact same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value—this format costs significantly less than a new textbook.**

By connecting applications, modeling, and visualization, Gary Rockswold motivates students to learn mathematics in the context of their experiences. In order to both learn and retain the material, students must see a connection between the concepts and their real lives. In this new edition, connections are taken to a new level with “See the Concept” features, where students make important connections through detailed visualizations that deepen understanding.

Rockswold is also known for presenting the concept of a function as a unifying theme, with an emphasis on the rule of four (verbal, graphical, numerical, and symbolic representations). A flexible approach allows instructors to strike their own balance of skills, rule of four, applications, modeling, and technology.

#### **Christina Almonte:**

As a college student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or make summary for some publication, they are complained. Just little students that has reading's internal or real their pastime. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Algebra and Trigonometry with Modeling & Visualization, Books a la Carte Edition (5th Edition) can make you sense more interested to read.
