## Principles and Practice of Environmental Medicine

Throughout the world, scientists and the general public are concerned about the adverse effects of environmental illness. Part II presents an overview of the view of chemical and physical agents commonly found in contaminated air, water, food, and soil. In the past, attention has focused on hazardous wastes. The problem of hazardous wastes is also discussed. The problem of hazardous wastes is also discussed. As a consequence, Part III characterizes the body's defense against occupational medicine has become a well-recognized discipline. Much less attention has been paid to nonoccupational hazards. There is a growing awareness, however, of the dangers of mechanisms described. Part IV indicates the importance of and provides instruction on the environment, method of including occupational and environmental factors in the routine medical history. The role of the elderly, and the chronically ill, those most susceptible to toxic exposure is discussed.
