Differential Forms and Applications (Universitext)

Manfredo P. Do Carmo

Differential Forms and Applications (Universitext) Manfredo P. Do Carmo

An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in \mathbb{R}^3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

From reader reviews:

Jesse Williams:

This Differential Forms and Applications (Universitext) book is simply not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is usually information inside this e-book incredible fresh, you will get data which is getting deeper an individual read a lot of information you will get. This kind of Differential Forms and Applications (Universitext) without we realize teach the one who studying it become critical in contemplating and analyzing. Don't end up being worry Differential Forms and Applications (Universitext) can bring whenever you are and not make your bag space or bookshelves' turn out to be full because you can have it within your lovely laptop even mobile phone. This Differential Forms and Applications (Universitext) having fine arrangement in word and layout, so you will not experience uninterested in reading.

Ila Petty:

Here thing why this particular Differential Forms and Applications (Universitext) are different and trusted to be yours. First of all looking at a book is good however it depends in the content of computer which is the content is as delightful as food or not. Differential Forms and Applications (Universitext) giving you information deeper since different ways, you can find any e-book out there but there is no reserve that similar with Differential Forms and Applications (Universitext). It gives you thrill reading journey, its open up your eyes about the thing in which happened in the world which is probably can be happened around you. It is possible to bring everywhere like in area, café, or even in your method home by train. If you are having difficulties in bringing the published book maybe the form of Differential Forms and Applications (Universitext) in e-book can be your substitute.

Juan Harrell:

The book untitled Differential Forms and Applications (Universitext) contain a lot of information on it. The writer explains the girl idea with easy means. The language is very simple to implement all the people, so do definitely not worry, you can easy to read it. The book was written by famous author. The author brings you in the new period of literary works. It is easy to read this book because you can please read on your smart phone, or product, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open their official web-site and order it. Have a nice examine.

Ruby Harris:

As a student exactly feel bored to help reading. If their teacher expected them to go to the library or even make summary for some publication, they are complained. Just tiny students that has reading's heart and soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you personally. As

we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Differential Forms and Applications (Universitext) can make you really feel more interested to read.
