## Transformation: Emergence of the Self: Carolyn and Ernest Fay Series in Analytical Psychology

Murray Stein

In *Transformation: Emergence of the Self*, noted analyst and author Murray Stein explains what this process is, and what it means for an individual to experience it. Transformation usually occurs at midlife, but is much more complicated than what we colloquially call a midlife crisis. Consciously working through this life stage can lead people to become who they are and have always potentially been. Indeed, Stein suggests, transformation is the essential human task. Stein first details how this process of transformation emerges and develops in an individual. Why does this transformation occur? And, more specifically, why does it so often occur in midlife?

Using the example of poet Rainer Maria Rilke, Stein clearly and carefully walks the listener through the hows and whys of the transformation process. Looking at C. G. Jung's life, Stein then explains how transformative images stimulate the transformation process by suggesting new ways of thinking and living. Intimate relationships, like those between a husband and a wife or a doctor and a patient, can also play a very powerful role in transformation. Finally, Stein examines the process in the lives of three important people, Jung, Picasso, and Rembrandt, whose experiences of transformation led to even greater creativity and freedom.

This book is successful both as an easy-to-understand elucidation of the transformation process and as an invitation to personal change. For those people who would like to learn what a meaningful second half of life could be like, *Transformation: Emergence of the Self* is an inspiring place to start.
