Current Therapy in Otolaryngology- Head & Neck Surgery George A. Gates MD FACS

This book consists of 124 brief chapters covering the treatment of most of the common and important clinical problems in otolaryngology - head and neck surgery that the average practitioner is likely to encounter. It focuses on clinical problems that are important because of morbidity, controversy about management, or the challenge of treating them. The book enables the practitioner to compare his/her own approaches with those used by the experts who write the chapters. The chapters are divided into four sections: The Ear and Temporal Bone, The Face, The Head and Neck, and General and Pediatric Otolaryngology.
