Community Strategic Visioning Programs Norman Walzer

Community visioning and strategic planning programs have become increasingly important in recent years as local governments in rural areas have searched for innovative ways to revitalize their local economies or manage population growth. A panel of experts describes local government programs in ten states. They also evaluate the effectiveness in reaching the vision and objective set forth in these programs. The authors examine the main components of each program and offer insights into factors contributing to its success. Major attention is paid to the need for social capital, benchmarking, and continuing support following the initial efforts. The discussion in the book includes recommendations for starting a community strategic visioning exercise.
