**Interest in Islamic Economics: Understanding Riba (Routledge Islamic Studies)** Abdulkader Thomas

With Islamic banking gradually becoming a more influential factor in the West, an analysis of the concept of *riba* – a definition of which is not given in the Qur'an – is long overdue. This text presents readers with various interpretations of this Islamic economic concept – generally perceived as 'interest'. Thomas provides a framework for understanding *riba* by examining:

- linguistics
- classical judicial analysis
- the historical context
- modern economics.

Including contributions from prominent international scholars, the book fills a gap in the existing literature and will be welcomed by academics and professionals with an interest in Islamic studies, economics and legal history.
