Data Mining: Foundations and Practice (Studies in Computational Intelligence)

Data Mining: Foundations and Practice (Studies in Computational Intelligence)

The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms. The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimulating new data mining research directions. We feel that the papers presented at these workshops may encourage the study of data mining as a scientific field and spark new communications and collaborations between researchers and practitioners.

To express the visions forged in the workshops to a wider range of data mining researchers and practitioners and foster active participation in the study of foundations of data mining, we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions. The content of this book includes studies of foundations of data mining from theoretical, practical, algorithmical, and managerial perspectives. The following is a brief summary of the papers contained in this book.

From reader reviews:

Melanie Roberts:

Book is usually written, printed, or highlighted for everything. You can learn everything you want by a e-book. Book has a different type. As you may know that book is important thing to bring us around the world. Adjacent to that you can your reading ability was fluently. A e-book Data Mining: Foundations and Practice (Studies in Computational Intelligence) will make you to be smarter. You can feel considerably more confidence if you can know about anything. But some of you think that open or reading some sort of book make you bored. It isn't make you fun. Why they are often thought like that? Have you in search of best book or ideal book with you?

Salvador Perez:

Book is to be different for every single grade. Book for children till adult are different content. As you may know that book is very important for us. The book Data Mining: Foundations and Practice (Studies in Computational Intelligence) ended up being making you to know about other information and of course you can take more information. It is very advantages for you. The e-book Data Mining: Foundations and Practice (Studies in Computational Intelligence) is not only giving you more new information but also to be your friend when you experience bored. You can spend your own spend time to read your book. Try to make relationship with the book Data Mining: Foundations and Practice (Studies in Computational Intelligence). You never experience lose out for everything if you read some books.

Hazel Makowski:

In this 21st century, people become competitive in every single way. By being competitive right now, people have do something to make these people survives, being in the middle of the actual crowded place and notice through surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. Yes, by reading a e-book your ability to survive boost then having chance to stay than other is high. For yourself who want to start reading a new book, we give you this specific Data Mining: Foundations and Practice (Studies in Computational Intelligence) book as starter and daily reading book. Why, because this book is greater than just a book.

Latoya Jones:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to select book like comic, quick story and the biggest some may be novel. Now, why not seeking Data Mining: Foundations and Practice (Studies in Computational Intelligence) that give your pleasure preference will be satisfied by simply reading this book. Reading addiction all over the world can be said as the opportunity for people to know world far better then how they react toward the world. It can't be mentioned constantly that reading practice only for the geeky person but for all of you who wants to end up being success person. So , for all you who want to start reading as your good habit, you may pick Data Mining: Foundations and Practice

(Studies in Computational Intelligence) become your personal starter.
