Reflow Soldering Processes Ning-Cheng Lee

Focused on technological innovations in the field of electronics packaging and production, this book elucidates the changes in reflow soldering processes, its impact on defect mechanisms, and, accordingly, the troubleshooting techniques during these processes in a variety of board types. Geared toward electronics manufacturing process engineers, design engineers, as well as students in process engineering classes, Reflow Soldering Processes and Troubleshooting will be a strong contender in the continuing skill development market for manufacturing personnel.

Written using a very practical, hands-on approach, Reflow Soldering Processes and Troubleshooting provides the means for engineers to increase their understanding of the principles of soldering, flux, and solder paste technology. The author facilitates learning about other essential topics, such as area array packages--including BGA, CSP, and FC designs, bumping technique, assembly, and rework process,--and provides an increased understanding of the reliability failure modes of soldered SMT components. With cost effectiveness foremost in mind, this book is designed to troubleshoot errors or problems before boards go into the manufacturing process, saving time and money on the front end. The author's vast expertise and knowledge ensure that coverage of topics is expertly researched, written, and organized to best meet the needs of manufacturing process engineers, students, practitioners, and anyone with a desire to learn more about reflow soldering processes. Comprehensive and indispensable, this book will prove a perfect training and reference tool that readers will find invaluable.

Provides engineers the cutting-edge technology in a rapidly changing field

Offers in-depth coverage of the principles of soldering, flux, solder paste technology, area array packages--including BGA, CSP, and FC designs, bumping technique, assembly, and the rework process

From reader reviews:

Alexandra Sauer:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each publication has different aim as well as goal; it means that book has different type. Some people feel enjoy to spend their a chance to read a book. These are reading whatever they consider because their hobby is reading a book. What about the person who don't like reading a book? Sometime, man or woman feel need book when they found difficult problem or exercise. Well, probably you'll have this Reflow Soldering Processes.

Kenisha Perkins:

A lot of people always spent all their free time to vacation as well as go to the outside with them family members or their friend. Are you aware? Many a lot of people spent these people free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read a book. It is really fun for yourself. If you enjoy the book which you read you can spent all day long to reading a guide. The book Reflow Soldering Processes it is very good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to deliver this book you can buy the e-book. You can m0ore very easily to read this book from your smart phone. The price is not to fund but this book offers high quality.

Victoria Schwan:

Your reading sixth sense will not betray a person, why because this Reflow Soldering Processes book written by well-known writer whose to say well how to make book which might be understand by anyone who else read the book. Written within good manner for you, dripping every ideas and writing skill only for eliminate your personal hunger then you still hesitation Reflow Soldering Processes as good book but not only by the cover but also by content. This is one reserve that can break don't determine book by its include, so do you still needing an additional sixth sense to pick this specific!? Oh come on your reading through sixth sense already told you so why you have to listening to an additional sixth sense.

Alice Walker:

In this period globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher this print many kinds of book. Often the book that recommended to you personally is Reflow Soldering Processes this e-book consist a lot of the information with the condition of this world now. This kind of book was represented how does the world has grown up. The language styles that writer use to explain it is easy to understand. Typically the writer made some analysis when he makes this book. That is why this book acceptable all of you.
