Blowout in the Gulf: The BP Oil Spill Disaster and the Future of Energy in America (MIT Press)

William R. Freudenburg, Robert Gramling

On April 20, 2010, the gigantic drilling rig *Deepwater Horizon* blew up in the Gulf of Mexico, killing eleven crew members and causing a massive eruption of oil from BP's Macondo well. For months, oil gushed into the Gulf, spreading death and destruction. Americans watched real-time video of the huge column of oil and gas spewing from the obviously failed "blowout preventer." What was missing, though, was the larger story of this disaster. In *Blowout in the Gulf*, energy experts William Freudenburg and Robert Gramling explain both the disaster and the decisions that led up to it. *Blowout in the Gulf* weaves a fascinating narrative of failures, missteps, and bad decisions, explaining why this oil spill was a disaster waiting to happen -- and how making better energy choices will help prevent others like it.
