The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) Mary Tiles

A century ago, Georg Cantor demonstrated the possibility of a series of transfinite infinite numbers. His methods, unorthodox for the time, enabled him to derive theorems that established a mathematical reality for a hierarchy of infinities. Cantor's innovation was opposed, and ignored, by the establishment; years later, the value of his work was recognized and appreciated as a landmark in mathematical thought, forming the beginning of set theory and the foundation for most of contemporary mathematics.

As Cantor's sometime collaborator, David Hilbert, remarked, "No one will drive us from the paradise that Cantor has created." This volume offers a guided tour of modern mathematics' Garden of Eden, beginning with perspectives on the finite universe and classes and Aristotelian logic. Author Mary Tiles further examines permutations, combinations, and infinite cardinalities; numbering the continuum; Cantor's transfinite paradise; axiomatic set theory; logical objects and logical types; and independence results and the universe of sets. She concludes with views of the constructs and reality of mathematical structure. Philosophers with only a basic grounding in mathematics, as well as mathematicians who have taken only an introductory course in philosophy, will find an abundance of intriguing topics in this text, which is appropriate for undergraduate-and graduate-level courses.

From reader reviews:

Jason Urso:

Do you have favorite book? Should you have, what is your favorite's book? E-book is very important thing for us to understand everything in the world. Each publication has different aim or perhaps goal; it means that guide has different type. Some people truly feel enjoy to spend their time to read a book. These are reading whatever they acquire because their hobby is reading a book. How about the person who don't like examining a book? Sometime, man feel need book once they found difficult problem as well as exercise. Well, probably you will require this The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics).

Chris Robertson:

The book The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) can give more knowledge and information about everything you want. So why must we leave the best thing like a book The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics)? A number of you have a different opinion about guide. But one aim which book can give many info for us. It is absolutely suitable. Right now, try to closer using your book. Knowledge or info that you take for that, you could give for each other; you can share all of these. Book The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) has simple shape nevertheless, you know: it has great and large function for you. You can seem the enormous world by start and read a guide. So it is very wonderful.

Steven Ellison:

This The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) are usually reliable for you who want to be a successful person, why. The key reason why of this The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) can be one of many great books you must have will be giving you more than just simple looking at food but feed you actually with information that probably will shock your earlier knowledge. This book is actually handy, you can bring it everywhere you go and whenever your conditions throughout the e-book and printed ones. Beside that this The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics) giving you an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we realize it useful in your day exercise. So , let's have it and revel in reading.

Jimmie Houck:

Reading a e-book tends to be new life style in this particular era globalization. With looking at you can get a lot of information that can give you benefit in your life. With book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire their particular reader with their

story or maybe their experience. Not only the storyline that share in the publications. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors nowadays always try to improve their ability in writing, they also doing some research before they write for their book. One of them is this The Philosophy of Set Theory: An Historical Introduction to Cantor's Paradise (Dover Books on Mathematics).
