A team of neuroscientists uncover amazing new capabilities in the brain that may steer human evolution toward miraculous and deadly frontiers in this spectacular debut work of speculative science fiction—*Limitless* meets James Rollins—that combines spirituality and science in an inventive, mind-blowing fashion.

For decades, scientists have speculated about the untapped potential of the human brain. Now, neuroscientist Chuck Brenton has made an astonishing breakthrough. He has discovered the key—the crucial combination of practice and conditioning—to access the incredible power dormant in ninety percent of our brains. Applying his methods to test subjects, he has stimulated abilities that elevate brain function to seemingly “godlike” levels.

These extraordinary abilities can transform the world, replacing fear and suffering with tranquility and stability. But in an age of increasing militarization, corporate exploitation, and explosive technological discovery, a group of influential power brokers are determined to control Brenton’s new superbeings for their own manipulative ends—and their motives may be far from peaceful.
